

Your Migration Option

Consider your migration Option from iScribe to *DxScript*

DxScript offers you a secure web-based ePrescribing application that is intuitive to use and implement, and easily migrates your practice from your current iScribe application. Moreover, DxScript is designed to utilize and print on your current secure script paper with peel-off chart label (<http://www.medical-forms.com/Laser-Prescriptions-for-DxScript-p214.htm>). Our team will implement your migration step-by-step with the minimum of difficulty or down time, and will ensure that your current patient demographics are linked to *DxScript*.

DxScript ePrescribing Features

- Allows you to print on your current secure script paper
 - Formulary and PBM drug validation and verification.
 - Electronic PDR at your fingertips.
 - DUR (drug-drug, drug-allergy, drug-age, etc.)
 - Patient demographics migrated from your PMS or EMR to *DxScript* using our custom PDX (Patient Data Exchange) - **NO COST TO YOU.**
 - Training and support to get you up and running as well as an ongoing technical support in the future - **NO COST TO YOU.**
- Fully supports Blackberry, iPhone, Palm, Windows Mobile 5 and Android device interface – **NO COST TO YOU**
 - Former and current iScribe users, please contact us for a special offer: customercare@nymed.net or customercare@dx-web.com or call (212) 967-1944
