

FOR IMMEDIATE RELEASE

**DxWeb® Achieves EHNAC Electronic Prescribing of Controlled Substances Certification
for Prescribing Applications**

Certification ensures adherence to data processing standards and compliance with security infrastructure and integrity requirements for all e-Prescribing transactions

New York, NY – June 3, 2015 – DxWeb®, a 23 year old medical technology and software company, announced today it has been certified with the Electronic Prescribing of Controlled Substances Certification Program for Prescribing Applications (EPCSCP-Prescribing) from the [Electronic Healthcare Network Accreditation Commission](#) (EHNAC). EHNAC’s program is approved by the Drug Enforcement Administration (DEA) and demonstrates the operational integrity of companies that use e-prescribing, by affirming compliance with industry regulations and all necessary standards for transaction timeliness, security and privacy with new prescriptions and renewals.

Through the consultative review process, EHNAC evaluated the DxWeb® electronic prescribing and fax-based prescribing transactions in the areas of confidentiality enforcement, level-of-service and escalation procedures, outcome-related metrics, security infrastructures and the ability to comply with industry-standard data formats. The thorough certification process demonstrates compliance with stringent DEA regulations and adherence to strict standards and participation in the comprehensive, objective evaluation of the organization’s business.

“The growth of e-prescribing in recent years has reached a strong uptick not only due to meaningful use measures, but because of the industry’s critical need for advancement of care and transitioning to electronic health records and processes,” says Lee Barrett, executive director of EHNAC. “Privacy, security and confidentiality continue to top the list of concerns for solution providers and their customers. The DxWeb® EHNAC EPCSCP-Prescribing certification is a significant achievement in ensuring full confidence in the integrity of their e-prescribing system and processes, and we are pleased to congratulate them.”

“DxWeb® is pleased to have certified our eRx application, DxScript®, for EPCS with EHNAC who is at the forefront of healthcare data transfer procedures in line with industry best practices. Our eRx solution, DxScript®, has been enhanced to comply with current DEA regulations, and provides us, healthcare providers and most importantly, patients with the assurance that PHI is maintained in the most secure and safe environment.” Ezra Hanz- EVP Sales and Marketing

About DxWeb

DxWeb® is a HIPAA compliant suite of cloud-based products that can be implemented in an ambulatory or hospital environment as an integrated system, or as stand-alone products depending on the needs of our client's work-flow. Providers may opt for implementing one DxWeb® product today using a computer or mobile device (Apple or Android), and add additional DxWeb® products at a later time. Because the full line of DxWeb® products have been designed as integrated applications, they are seamlessly interoperable within the suite or with third party applications.

The DxWeb® interface engines that allow our applications, DxScript®, DxECHO® or DxRAD®, to integrate with 112 third party Practice Management, Electronic Health Records, RIS, PACS and Structured Reporting systems. The result is that a medical practice or institution will realize its existing investment to the fullest extent and purchase only those application(s) that it needs, thus saving time and money in implementation and application costs.

About EHNAC

The Electronic Healthcare Network Accreditation Commission (EHNAC) is a voluntary, self-governing standards development organization (SDO) established to develop standard criteria and accredit organizations that electronically exchange healthcare data. These entities include accountable care organizations, electronic health networks, EPCS vendors, eprescribing solution providers, financial services firms, health information exchanges, health information service providers, management service organizations, medical billers, outsourced service providers, payers, practice management system vendors and third-party administrators.

EHNAC was founded in 1993 and is a tax-exempt 501(c)(6) nonprofit organization. Guided by peer evaluation, the EHNAC accreditation process promotes quality service, innovation, cooperation and open competition in healthcare.
