A SIMPLE SOLUTION FOR YOUR E-PRESCRIBING NEEDS.

- Integrated or stand-alone
- Certified for EPCS
- CCD/CDA via API, HL7,PDX
- Cloud-based

DxScript® +EPCS

Mobile. Secure. Cost Effective. Intuitive.

DxScript®+EPCS is a HIPAA compliant, Surescripts™ and EPCS certified, cloud-based ePrescribing solution that puts insurance, pharmacy benefits plan eligibility and formulary information at the provider's fingertips at the point of prescribing.

We maintain a database of the latest FDA and DEA released medications as well as all pharmacies that are EDI or eFax capable.

Our electronic PDR provides our users real time drug-to-drug, drug to allergies and drug to food contraindication alerts at the point of care.

DxScript even suggests alternative drugs in the event there is a contraindication or allergy alert for a specific drug.

No proprietary hardware or software required. All training and set-up is performed by professional Customer Care Engineers at NO COST to the provider(s).

Technology Solutions for Today's Medical Practice

- Secure cloud-based application (SAAS)
- Supports iPhone, iTouch, iPad and Android mobile devices
- Transmit scripts via EDI or print from computer or mobile device
- Integration via HL7, CCD/CDA via API, or PDX with over 100 EMRs and PM systems
