- DxScript®/+EPCS is a HIPAA compliant, Surescripts™ and EPCS certified, cloud-based ePrescribing solution that puts insurance, pharmacy benefits plan, eligibility and formulary information at the provider's fingertips at the point of prescribing.
- We maintain a database of the most up to date FDA and DEA released medications as well as nationwide pharmacies.
- Our electronic system provides our healthcare providers real time drug-to-drug, drug to allergies and drug to food contraindication alerts at the point of care.
- DxScript can suggest alternative drugs in the event there is a contraindication or allergy alert for a specific drug.
- No proprietary hardware or software required. All training and set-ups are performed by qualified, professional Customer Care Engineers at NO COST to the provider(s).

Unique features

- HIPAA compliant cloud-based application (SAAS)
- Integration with EHR/EMR/PM systems at no cost, or stand-alone option
- DEA compliant and certified for EPCS in all 50 states
- Prescription Drug Monitoring Program (PDMP)
- Surescripts / NCPDP certified for RxChange/RxFill/NewScript
- Unique features including: Fill Status Alert, Physician Refill Alert
- CCD/CDA via API/FHIR, HL7, SOAP services
- Exostar, Surescripts and Drummond certified
- Designed using AI and Machine Learning Technology

Technology solutions for today's medical practice.

- Supports iPhone, iPad and Android mobile devices
- Safari, Chrome and Edge compatible (browser agnostic)
- Simple to use Two Factor Authentication (2FA) function when writing Controlled Substances
- Transmit scripts via EDI, or print from computer or mobile device
- Integration via HL7/FHIR/CCD/CDA via API, or SOAP services with over 100 EMRs and PM systems
- Encryption at Rest security feature ensures protection of PHI
- Migration of patient demographics from any other system/ePrescribing application to DxScript
- Fully trained support staff ready to assist by phone or email at no additional cost

Databases provide clinical information -- instantly.

- Automatic patient specific DUR alerting providers to any indications, contraindications, allergies, etc.
- Complete database of pharmacies that are EDI and/or eFax capable
- Electronic PDR is included for further research pertaining to any FDA/DEA approved medication
- Validation and eligibility of patient Pharmacy Benefits Plan Technology
- Integrated PDMP (Prescription Drug Monitoring Program) access into the provider workflow to over 47 states.
- On Demand Formulary (ODF) ready

- Live demos may be scheduled at any time
- Patient Demographics Migration
- Network Print Manager setup
- No-cost training
- Ongoing support for providers and staff
- No-cost setup of mobile devices (iPod Touch, iPad, Android)

Unique functions

FSA (Fill Status Alerts): DxScript will inform the physician, within 5 days after prescription was sent to the pharmacy, that a patient has not been dispensed their initial or refill medication(s). FSA reduces patient abandonment of their treatment.

Clinical Connection: Alerts healthcare providers to studies and relevant clinical information pertaining to the medications they prescribe as well as offer information about newly FDA approved therapies, and available financial support to aid their patients to get on and remain on therapy.

Electronic PDR (Physician's Desk Reference): integrated within our system.

RxCancel: Providers can cancel electronically sent prescriptions within DxScript.

RxChange: Pharmacies can electronically request modifications or clarifications to prescriptions of the prescribing provider within the DxScript workflow.

PDMP: Integrated within workflow Automatic connectivity to state-specific PMP databases that allow physicians to check any given patient's score prior to prescribing Schedule drug(s).

RTPB: (Real-Time Prescription Benefits): Offers transparent prescription benefits, aiding both HCPs and patients in making informed decisions regarding medication costs, pharmacy options, and more, based on a patient's PBM benefits.

ODF: (Online Drug Formulary): Provides providers with current information on covered and preferred drug options from the patient's PBM.
